

RESUME

ABOUT ME

Natural Environmental Engineer, currently undertaking a master's programme about Geographic Information Systems (GIS) with ESRI Spain. Fascinated about GIS and its many uses for all kind of fields. I want to focus my career on the use of programming (JavaScript, PHP, Python, Java, mySQL) in GIS and Remote Sensing.

Self-motivated, resourceful, able to manage multiple tasks and documents simultaneously, and well-organized meeting deadlines, with excellent inter-personal skills. I'm a beginner in Web Design and Development, but I would like to develop my skills on this field, in order to make efficient use of these resources in my future jobs.
